WORK EXPERIENCE

Fullstack developer   June 2023 - Present

ntwist.com | Hyderabad, India

- Overhauled the entire platform with a focus on creating a more user-friendly UI and UX, enhancing the overall user experience.
- Initially served as the company's sole full-stack developer, handling all front-end and back-end tasks independently.
- Implemented key optimizations to significantly improve the platform's performance and strengthen its security measures.
- Managed and executed multiple projects on the same platform, ensuring consistency and quality across all developments.
- Contributed to defining and establishing the company's development cycle, ensuring efficient and streamlined processes.
- Played a pivotal role in onboarding and mentoring new team members, sharing expertise and best practices.

Fullstack developer   August 2022 - june 2023

Freelancer | Andhra pradesh, India

- Delivered customized web applications for clients, tailoring solutions to meet diverse business needs and ensuring high-quality results.
- Initially focused on front-end development using HTML, CSS, and JavaScript, building a strong foundation in web design and user experience.
- Proactively expanded skill set by learning the MERN stack, enabling the delivery of more complex, full-stack web applications with enhanced functionality and performance.
- Successfully transitioned from basic web development to full-stack projects, increasing the value offered to clients and broadening the scope of services provided.

PROJECTS

Restorio.ro

Developed a website for Restorio, an Apple repair store in Romania, showcasing their services with a sleek, user-friendly design.
Technologies Used: Next.js, NextApi, Reactjs, MongoDB, Node.js, HTML, CSS, TailwindCss

Webcreatives.io

Designed and developed a responsive frontend for Webcreatives, a web design and development service provider in India, focusing on a modern and visually appealing interface.
Technologies Used: Next.js, NextApi, Reactjs, Node.js, HTML, CSS, TailwindCss

Outlight.live

Created a full-stack website for Outlight, a service platform offering solutions for Instagram and YouTube. The project involved developing a comprehensive site with both front-end and back-end functionalities.
Technologies Used: Next.js, NextApi, Reactjs, Node.js, HTML, CSS, TailwindCss, MongoDB.
